

Franklin Avenue Sewer Separation Project Hartford, CT

Project Description:

Location

Hartford, CT

Owner

MDC

Duration

2008-09

AI Engineers, Inc. is currently completing topographical survey of storm drainage systems and sanitary sewers in the south end of Hartford in and around Franklin Ave., Wethersfield Ave. and Maple Ave. This project shall be integrated into the longer MDC combined sewer separation project. The tasks include horizontal and vertical controls using GPS as well as conventional surveying. AI's field data is being incorporated into existing aerial mapping of the project area.

Salient Features

- Horizontal and vertical control using GPS
- City of Hartford traffic coordination with other city agencies
